

DESCRIPTION

Come and fine tune your snow and ice knowledge at this **free** 3-hour pilot workshop on snow and ice operations for supervisors and managers. Properly managing winter operations is crucial to the safety of the roadways, as well as your winter operations budget.

Baystate Roads needs your help to assess this 3-hour pilot workshop as a template for both a 6-hour class (in the Fall) for supervisors, as well as, a 6-hour driver/operator workshop. Don't miss this opportunity to contribute to our future workshops, to network with your peers and to enhance your knowledge on this important topic.

Contact dan@baystateroads.org for additional information.

Maximum class size is 30

SPEAKER

DUANE E. "DEWEY" AMSLER, SR., P.E.

Mr. Amsler has nearly 47 years of experience in highway research, claims and litigation, operations and maintenance. His experience ranges from equipment operations to senior level management in a state highway agency. Mr. Amsler is an internationally recognized expert in snow and ice control operations and technology. In 1996, Mr. Amsler retired from the New York State Department of Transportation and formed AFM Engineering Services, which specializes in highway snow and ice control (training, technology, and applications), claims and litigation support, and operational research.

WHO SHOULD ATTEND

The program is open to all foremen, supervisors or roadway managers who are responsible for the management of snow and ice operations for their towns or cities.

This course counts towards .05 Roads Scholar

Credit/0.3 CEUs
