

DESCRIPTION

The Roadway Work Zone Construction Safety Course is designed around core safety and health hazards common to the roadway construction industry. This program focuses on highway construction activities that are responsible for the majority of work zone fatalities and serious injuries. At the same time, it addresses some of the serious hazards that are common to all construction operations. The course material is geared toward roadway work zone construction workers. The course design focuses on practical approaches to recognizing and controlling OSHA identified construction hazards.

Contact the Baystate Roads Program for additional information at: dan@baystateroads.org
Maximum class size is 35

SPEAKER

Patricia "Patty" Stagno

Patricia Stagno, President and owner of Power Skills for Life, LLC of Goffstown, NH, is an accredited Women Business Enterprise (WBE), Veteran (VOB) and Woman Owned Business (WOB). Power Skills for Life provides safety, training and compliance consulting for construction, manufacturing, maritime, building facility maintenance, municipalities and utility industries. Patricia travels throughout the country to design and develop structured hands-on training modules for technical, mechanical and electrical training programs for large and small companies. She is the first woman in the state of New Hampshire to hold all five certificates from the OSHA Training Institute and Keene State College in Emergency Management, Maritime, Construction, Industrial Hygiene and General Industry.

WHO SHOULD ATTEND

Workers involved in construction projects, supervisors, and other personnel responsible for construction activities should attend this workshop.
